## SKILLS

**Programming Languages:** C/C++, Python, Java, PHP, JavaScript, HTML  
**Frameworks & Libraries:** React.js, Django, Django Rest Framework, Tailwind CSS  
**Databases:** MySQL, SQLite3, MongoDB  
**Tools & Platforms:** Git, GitHub, VS Code, Vercel, PythonAnywhere

## WORK EXPERIENCE & TRAINING

**SearchAshiyana (Online Property Portal)** Jun’ 25 – Aug’ 25  
Website Data Management & SEO Intern

- Managed and updated real estate property data on the company website, ensuring accuracy and consistency.
- Optimized website content and property listings to improve search engine visibility (SEO).
- Collaborated with development and content teams to maintain data quality and relevance.
- Applied technical and analytical skills to ensure listings were user-friendly and SEO-compliant.

**The Angaar Batch (Edtech Training Platform)** Jun’ 25 – Jul’ 25  
Full stack development with Django & AI agents

- Completed an intensive full-stack development course with Django and AI integration.
- Built dynamic projects combining frontend, backend, and AI-powered automation.
- Gained hands-on experience with database management, user authentication, REST APIs, and deployment.
- Strengthened skills in responsive UI design, interactive forms, and workflow automation.

## PROJECTS

**Personal Portfolio** | *Python, Django, React.js, n8n* Aug’ 25

- Developed a dynamic personal portfolio website with responsive UI using React.js and Tailwind CSS.
- Integrated Django REST Framework backend & Admin Panel for real-time content updates without redeployment.
- Automated contact form email notifications using n8n workflows for instant communication.
- Deployed frontend on Vercel and backend on PythonAnywhere to ensure scalability and reliable performance.

**AI Story Generator** | *Python, Django, Google AI Studio* Jul’ 25

- Built a Django-based web app to generate personalized AI-driven children’s stories from user inputs.
- Enabled story export in PDF and audio formats with secure authentication (login, signup, password reset).
- Designed interactive UI with HTML, Tailwind CSS, and JavaScript for seamless user experience.
- Implemented user-specific storage and dashboard for managing saved and shared stories.

**Ecommerce Platform** | *PHP* Apr’ 25

- Built a fully functional ecommerce platform in PHP with dynamic product listing, search, and category filtering.
- Designed responsive UI using HTML, Tailwind CSS, and JavaScript for seamless cross-device shopping.
- Implemented authentication with session management and a robust cart system (add, update, remove).
- Developed secure checkout flow with order summary and validation to simulate real purchase behavior.

## CERTIFICATES

Full Stack with Django & AI Agents | *The Angaar Batch* Jul’ 25  
Web Development Upskilling | *My Job Grow* Dec’ 24  
Responsive Web Design | *freeCodeCamp* Nov’ 23

## EDUCATION

**Lovely Professional University** Phagwara, Punjab  
Bachelor of Technology Aug’ 23 – Present  
Computer Science and Engineering; CGPA: 8.11

**Vikash Residential School** Bargarh, Odisha  
Intermediate Mar’ 21 – May’ 23  
PCM; Percentage: 77%

**O.P. Jindal School** Tamnar, Chhattisgarh  
Matriculation Mar’ 20 – Apr’ 21  
Percentage: 93.8%
