WORK EXPERIENCE & TRAINING

SearchAshiyana (Online Property Portal)   Jun' 25 – Aug' 25
Website Data Management & SEO Intern
- Managed and updated real estate property data on the company website, ensuring accuracy and consistency.
- Optimized website content and property listings to improve search engine visibility (SEO).
- Collaborated with development and content teams to maintain data quality and relevance.
- Applied technical and analytical skills to ensure listings were user-friendly and SEO-compliant.

The Angaar Batch (Edtech Training Platform)   Jun' 25 – Jul' 25
Full stack development with Django & AI agents
- Completed an intensive full-stack development course with Django and AI integration.
- Built dynamic projects combining frontend, backend, and AI-powered automation.
- Gained hands-on experience with database management, user authentication, REST APIs, and deployment.
- Strengthened skills in responsive UI design, interactive forms, and workflow automation.

PROJECTS

Personal Portfolio | *Python, Django, React.js, n8n*   Aug' 25
- Developed a fully dynamic personal portfolio website showcasing projects and skills.
- Built responsive and interactive frontend using React.js and Tailwind CSS for a smooth user experience.
- Integrated Django REST Framework backend with Django Admin Panel for real-time content updates without redeployment.
- Automated email notifications from contact form using n8n workflows for instant communication.
- Deployed frontend on Vercel and backend on PythonAnywhere to ensure scalability and reliable performance.

AI Story Generator | *Python, Django, Google AI Studio*   Jul' 25
- Built a dynamic web application using Django to generate personalized stories for children based on user inputs like character, theme, and age.
- Implemented AI-driven story creation, with features to convert stories to downloadable PDFs and audio narration.
- Designed user-friendly forms and interactive UI using HTML, Tailwind CSS, and JavaScript.
- Secure user authentication system with login, registration, and password reset features.
- Managed user-specific story storage, enabling dashboard access to saved and shared stories.

Ecommerce Platform | *PHP*   Apr' 25
- Developed a fully functional ecommerce platform using PHP with dynamic product listing, search, and category filtering.
- Designed responsive frontend using HTML, Tailwind CSS, and JavaScript to deliver seamless shopping experience across devices.
- Implemented user authentication (login, signup, logout) and session management for secure access.
- Built robust cart system supporting add-to-cart, quantity update, and item removal using PHP sessions.
- Integrated checkout flow with order summary and input validation to simulate real purchase behavior.

CERTIFICATES

Full Stack with Django & AI Agents | *The Angaar Batch*   Jul' 25

Web Development Upskilling | *My Job Grow*   Dec' 24

Responsive Web Design | *freeCodeCamp*   Nov' 23

EDUCATION
